## A Ward from the Author

## Dear Teachers,

In 1979, I began writing children's mysteries set at historic sites that still existed-primarily so that kids could go and see what they had read about. Frankly, I found no more fun, educational, and stress-free (actually, just plain joyful!) activity to do with my then school-age children than to visit a fascinating historic site!

A visit to Hershey, Pennsylvania is a chance to learn about a remarkable man and his remarkable achievements. Born a farm boy in Pennsylvania, Milton Hershey tried and failed at several businesses before succeeding at making caramel candy. By then, he was almost 40 years of age! Talk about perseverance!

Once Milton focused on making chocolate, the rest is history! But Milton was more than a successful businessman, he was also a true philanthropist. He built a "company town," with schools, stores, and an amusement park. He used his chocolate fortune to build a trade school for orphan boys. There are many lessons for kids to learn by reading about the legacy of Milton Hershey.

One of the things I like most about writing these kinds of mysteries is helping kids and adults learn together. Reading and going and seeing and doing is what education is all about. And sometimes, "adopting" a subject or place leads to a lifelong interest in an era, a place, or a people.

Enjoy your tasty Hershey chocolate adventure!

As a mother and an author, one of the fondest periods of my life was when I decided to write mystery books for children. At this time (1979) kids were pretty much glued to the TV, something parents and teachers complained about the way they do about video games today.

I decided to set each mystery in a real place-a place kids could go and visit for themselves after reading the book. And I also used real children as characters. Usually a couple of my own children served as characters, and I had no trouble recruiting kids from the book's location to also be characters.

Also, I wanted all the kids-boys and girls of all ages-to participate in solving the mystery. And, I wanted kids to learn something as they read. Something about the history of the location. And I wanted the stories to be funny.

That formula of real+scary + smart + fun served me well. The kids and I had a great time visiting each site and many of the events in the stories actually came out of our experiences there. (For example, Papa and I really did stay at the glamorous Hotel Hershey and went on the Hershey factory tour!)

I love getting letters from teachers and parents who say they read the book with their class or child, then visited the historic site and saw all the places in the mystery for themselves. What's so great about that? What's great is that you and your children have an experience that bonds you together forever. Something you shared. Something you both cared about at the time. Something that crossed all age levels-a good story, a good scare, a good laugh!

30 years later,

Harrisburg is the capital of Pennsylvania. It is about 105 miles northwest of Philadelphia.
"Rowdy" means noisy and disorderly.
"Goodnight Irene" was written in 1886 by Gussie L. Davis, an African-American songwriter from Cincinnati, Ohio. The song was later recorded by many singers including Ledbelly, Johnny Cash, Frank Sinatra, and Raffi. You may have heard the song. The chorus goes like this:
Irene goodnight, Irene goodnight
Goodnight Irene, goodnight Irene
I'll see you in my dreams

A "wrangler" is someone who looks after horses.

A "factotum" is someone who is hired to do a variety of jobs for someone else.

Hershey, Pennsylvania, The Sweetest Place on Earth, is 14 miles east of Harrisburg. The town was originally named Derry Church, but was renamed in 1906 to honor Milton Hershey's chocolate. It is sometimes called "Chocolate Town, USA."

Heelies are shoes with removable roller skate wheels in the heels.

The phrase "no one here except us chickens" is a funny way of describing being totally alone.

The word "intrigue" has more than one meaning. As a noun, it means an interesting or mysterious plot. As a verb, it means to make someone very interested in something.

Mimi says that Christina inherited her mystery genes. Do you think that the trait of loving a mystery is something that is passed on genetically from parent to child like skin or eye color?

A "finagler" is someone who makes a situation work to his own advantage.
"Doff" is an old English word from the 1300s that was a contraction of the words do off, which meant to take off. Can you guess the opposite of doff? It's don, the contraction for do on.

When someone is "flabbergasted," they are completely astonished.

A "wintry mix" describes winter weather that can include light snow, rain, sleet, and icy conditions.

The expression "the cat's pajamas" is a fun phrase from the 1920s that means something is great, wonderful, and truly terrific!

Blushing occurs when the body sends an increased blood supply to the face, ears, and neck during times of anxiety or stress. People blush when they are surprised, embarrassed or angry. Some people blush more than others.
"Shenanigans" are playful tricks and fun-loving behavior.
"Raising an eyebrow" is a way of showing skepticism or disbelief.

## Onomatowhat?

An onomatopoeia (pronounced on'-nuh-mat-uhp $\overline{\mathrm{e}}-\mathrm{a}$ ) is a word that imitates the sound that it represents. Examples of onomatopoeia are hiss, thump, bang and oink.

## Silver Dollar Facts

- The term "silver dollar" is used to mean any United States dollar coin made of a white metal.
- Some people insist that a dollar is not silver unless it contains some of that metal. Silver has not been used in silver dollars since 1934.
- Silver dollars, the first United States dollar coins, were minted beginning in 1794.
- The word "dollar" comes from the Spanish word dólar.
- Spanish silver dollar coins minted before the Revolutionary War were called pieces of eight because they were sometimes cut into halves, quarters, and eighths.
- The United States began minting the Sacagawea dollar in 2000. This dollar coin is composed of copper, zinc, manganese, and nickel and has a golden color. Beginning in 2007, presidential dollar coins will be minted and will also have a golden color.

## 3D Fun

2-D means having twodimensions: height and width. Draw an airplane on a piece of paper. Your drawing has height and width, but not depth. You can't hold just the airplane in your hand.

## 3-D means threedimensional.

Fold a piece of paper into a paper airplane. Your airplane has height, width, and depth. You can hold it in your hand.

In the not-so-distant past, the illusion of depth in a picture or movie was created with special photography techniques combined with 3-D glasses. You've probably worn the special glasses which usually have one red lens and one blue lens. They work by presenting a slightly different image to each eye.

Today, because computers are more powerful than ever before, and scientists know more about how our vision works than ever before, 3-D graphics have become more common and more realistic. 3-D imaging is used in movies, computer games, medical technology, computer art, astronomy, and other areas.

## Hershey Zoo

The Hershey Zoo started with Franz and Louise Zinner. The Zinners moved to Pennsylvania from Germany in 1899. They became good friends with their new neighbors. Before long, though, their neighbors moved from Pennsylvania to the western United States. In 1905, they sent the Zinners a gift - twelve prairie dogs!

## Franz Zinner knew that

 Milton Hershey was having a new park built in Hershey, so he asked him if the prairie dogs could become a park attraction.Not long afterwards, the Zinners received another gift from their old neighbors. This time it was a bear cub! Again, Mr. Zinner asked Mr. Hershey if he would let the animal live at the park. A zoo was born and Franz Zinner became the zookeeper!

From the time it first opened, until 1942, the zoo acquired many animals. Birds, elephants, buffalo, orangutans, lions, penguins, monkeys, crocodiles and poisonous snakes were favorites. But in 1942, with many zoo workers leaving for military service in World War II, the zoo was closed and the animals were sold to other zoos.

In 1950, the zoo reopened. It closed again in 1971 but reopened in 1978 as ZooAmerica.

## A Trolley By Golly

Trolley History

A trolley is a type of streetcar. The first trolleys were pulled by a horse in New York City in 1834. New Orleans implemented a trolley system in 1835. Both systems ran on rails that had been placed on the street, often causing pedestrians to trip. In 1852, rails were buried to reduce accidents.

In 1888 trolleys started to use a different source of power. They used a "trolley pole" to gather power from an overhead wire to power the trolley.

The Hershey Trolleys
Trolleys were an important part of Milton Hershey's plan for the town. He planned to use them to bring both milk and workers to the factory. He wanted students to ride trolleys to school. Regular trolley service began in Hershey in 1904.

During the 1930s, the passenger trolleys were converted to carry building materials for the construction of Hotel Hershey. In 1939, bus service replaced the trolley system.

Hershey Trolley Works opened in 1995. The attraction features a narrated trolley ride with singing conductors!

## Be a chocolate taster!

Try a triangular taste test. Put on a blindfold and have your friend give you three very small pieces of chocolate. Two of the pieces should be the same kind. One piece should be a different kind. Taste each one and see if you can tell which two are the same. If you can, you might have a career as a professional chocolate taster!

## Art: Create It!

1. Make your own Hershey's Kiss! Write a message on a narrow piece of paper. Form tissue paper into a kiss shape. Put the tissue paper on a piece of foil. Wrap the foil around the kiss shape. Put the plume in the top and twist the foil around it just like a real kiss!
2. Draw a picture of these idioms:

- Cat's pajamas
* alike as two peas in a pod
* couch potato

3. What could be more fun than making a chocolate sculpture? You can even eat as you work! Here's a recipe for chocolate clay:

You will need:
O 10 ounces of chocolate chips
O $1 / 3$ cup of light corn syrup
O wax paper

1. Melt the chocolate in a microwave oven for 1 minute. Stir. If the chocolate is not completely melted, microwave for 30 more seconds. Stir.
Return to microwave if
 necessary.
Stir until smooth.
2. When the chocolate is melted, blend in the corn syrup.
3. Pour the mixture onto a waxed paper sheet.
4. Spread the chocolate to about $1 / 2$-inch thick. Cover loosely with waxed paper and let it stiffen for several hours or overnight. The chocolate clay will be about the consistency of modeling clay. After a few days, your sculpture will harden. Do not eat old clay!
5. The trolley conductor said the town was "built on chocolate." Imagine how a town built on chocolate would look. Sketch or paint a picture of it.
6. Have you ever painted with pudding? Chocolate pudding makes great finger paint. Of course, you can use a brush, too! Add other flavors to make your painting more interesting (and delicious).

## Science: Cagk It!

In creating this delicious treat, you'll turn a solid into a liquid. Then you'll combine the liquid with another ingredient to form a semi-solid. Last, you'll see how a low temperature can help a material solidify.

## Mimi's Mud Pie

NOTE: The preparation of all dishes should be carried out with the supervision of an adult.

## Chocolate in Bloom

If you've ever saved your Halloween candy for several months, you might have seen "chocolate bloom." This is the white film that sometimes forms on chocolate.

Sometimes people think this means that the chocolate is spoiled. Not so! Bloom happens when chocolate is kept at a temperature of over 70 degrees. Some of the cocoa butter in the chocolate separates and goes to the surface of the chocolate. Then, when the temperature falls, the cocoa butter forms the white film on the chocolate.

Blooming chocolate may not be as smooth as it should be-but it tastes just as good!
